## **DETAIL ACTION**

### ***Reasons For Allowance***

1. Claim 1 is allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus for effectively injecting plasma in an atmosphere with less power consumption by comprising a plurality of dielectric panels disposed in parallel at predetermined spaced intervals, a gas supply to which the dielectric panels are fixed and which supplies a gas to spaces between the parallel dielectric panels; power electrodes wherein each is linearly installed near the gas supply portion and at the spaces between the dielectric panels; ground electrodes, wherein each formed in one end of each of the dielectric panels; and a high frequency generator which applies high frequency power to the power electrodes and the ground electrodes.
3. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Tidman et al. (US Pat. 4,429,612) discloses method and apparatus for accelerating a solid mass. Mashima et al. (US Pub. 2005/0127844) discloses light high frequency power supply structure and plasma CVD device. None of cited/record prior arts stands alone or combination with others discloses all limitation required in claim invention.

### ***Correspondence***

Any comments considered necessarily by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
